

## GRA 422 • CheatSheet Tutorial 2 • Styles

### Using the <style> Tag

1. In the <head> of your document, open a <style> statement with opening and closing tags.
2. Rewrite all of the inline or local style tags you inserted in Tutorial 1 for the embedded or global style statement. Verify that they all work.
3. Open a new Dreamweaver file of type .css.
4. Copy all the <style> declarations from the embedded or global style (without the <style> tags) into the file, and Save As “styles.css.”
5. Link the file “greywolf.html” to “styles.css.” Verify that all the styles look the same.

```
<link href="styles.css" type="stylesheet">
```

### Making the Home Page

1. Open the file “index\_START.html” in Dreamweaver.
2. Insert and centre the Header image: “\_DSC0067\_1004.jpg.”
3. Link to Home (index.html) and The Grey Wolf (greywolf.html) pages.
4. Designate each paragraph with a <p> tag (opening and closing tags).

### Choose a Google Font

Choose a decorative Google font ([www.google.com/fonts](http://www.google.com/fonts)) appropriate to the content. Link this font and designate for the header tag.

### Upload to Site

Add “index.html” to your Site Folder, upload to your STW site, set permissions, and verify.
